Introduction

ESP2000D Amplifier with Control & Diagnostics Tool

The ESP2000D is a two channel rack mountable power amplifier. The unit contains two separate 1000 watt amplifiers, two independent power supplies, (each channel running off each power supply), two signal paths, inputs and outputs as well as limiting and low frequency enhancement on each of the two channels within a two rack unit chassis. It can be used to power any range of passive loudspeakers as well as being specifically designed for optimised performance with KV2 Audio's ESD Series. ESP2000D is now configurable via the front panel or remotely using KV2 Control & Diagnostics Tool.

Product code: KVV 987 412 (250V)
KVV 987 411 (230V)
KVV 987 410 (115V)

Features

- Very high definition
- 2 channel rack mountable power amplifier
- 2 x 1000W / 2Ω
- Separate power supplies ensure increased reliability and continuous delivery of full power
- Two shock mounted fans move air across the fins but never directly across the electronic components. Minimises maintenance cycles and improves the components lifespan and reliability
- Configurable via the front panel or remotely using KV2 Control & Diagnostics Tool
